

ASMO NORTH CAROLINA, INC.
STATESVILLE, NORTH CAROLINA

Asmo North Carolina, Inc., of Statesville, North Carolina makes dc electric motors to power automobile windows, a/c and r/f systems. It was certified to ISO 14001 in January 1998.

ENVIRONMENTAL
PERFORMANCE

Past Accomplishments

Asmo North Carolina has demonstrated its commitment to environmental performance through reducing VOC emissions and hazardous materials use. Since 1999 the facility has:

- **Reduced VOC emissions** 29% through changing the coating on housings. Power window housings were changed to zinc-coated steel; two other models were changed from painted to powder-coated housings.
- **Reduced hazardous materials use** 32% by changing motor housing coatings.

Future Commitments

Asmo North Carolina is working to reduce emissions of VOCs, hazardous materials use, total solid waste, and product packaging waste. By 2004 the facility will:

- **Reduce VOC emissions** another 29% by changing the coating on additional motor housings from paint to zinc or powder.
- **Reduce hazardous materials use** by changing the coating on additional motor housings from paint to zinc or powder.
- **Reduce total solid waste** by 40% through recycling and other waste reduction measures.
- **Reduce product packaging waste** 20% by switching from cardboard to returnable totes.

COMMUNITY OUTREACH

AT A GLANCE:

Industry Sector:	SIC 3621
Business:	Makes dc electric motors for automotive applications
Employees:	500-1,000
Accomplishments:	Reduced emissions of VOCs Reduced hazardous materials use
Commitments:	Reduce emissions of VOCs Reduce hazardous materials use Reduce total solid waste Reduce packaging waste
Address:	470 Crawford Road Statesville, NC 28625
Website:	www.asmo-na.com

Asmo North Carolina responds to and documents all community inquiries. It will make its annual performance report available through its website, www.asmo-na.com, and will also present the results at city and county meetings.
